

How to Get GPS Coordinates in Google Maps on a PC

1. Open your browser, any browser will do the trick.

2. Type in “maps.google.com” in the URL bar.

3. Navigate to the place you want the coordinates for by using your mouse.

4. Long Press Primary Mouse key on desired place

- A grey pin will appear after long press
- A small card will show at the bottom with details about the location.
- The GPS coordinates will be listed as part of the information.
